

## SIRIUS Product List

### WiFi Based Intrusion & Fire Alarm Panel

Product	Features
Sirius WiFi - 1Z Alarm Panel	1 Zone, 1 Output, Telegram Connected, WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 1Z Alarm Panel	1 Zone, 1 Output, Wireless (99 devices), WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 1Z Alarm Panel	1 Zone, 1 Output, Telegram Connected, Wireless (99 devices), WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 2Z Alarm Panel	2 Zones, 1 Output, Telegram Connected, WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 2Z Alarm Panel	2 Zones, 1 Output, Wireless (99 devices), WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 2Z Alarm Panel	2 Zones, 1 Output, Telegram Connected, Wireless (99 devices), WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 3Z Alarm Panel	3 Zones, 1 Output, Telegram Connected, WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 3Z Alarm Panel	3 Zones, 1 Output, Wireless (99 devices), WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 3Z Alarm Panel	3 Zones, 1 Output, Telegram Connected, Wireless (99 devices), WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 4Z Alarm Panel	4 Zones, 1 Output, Telegram Connected, WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 4Z Alarm Panel	4 Zones, 1 Output, Wireless (99 devices), WiFi based Communication, HMS/CMS Compatible
Sirius WiFi - 4Z Alarm Panel	4 Zones, 1 Output, Telegram Connected, Wireless (99 devices), WiFi based Communication, HMS/CMS Compatible

### GSM Based Intrusion and Fire Alarm Panel with Autodialer

Product	Features
Sirius GSM - 4Z Alarm Panel	4 Zone , 1 Output, Autodialer, Calling with 10 seconds voice message with zone wise notification and SMS Message on 10 mobile number, 1 SMS template, 1 Voice message, HMS/CMS Compatible
Sirius GSM - 6Z Alarm Panel	6 Zone , 1 Output, Autodialer, 1 SMS template, 1 Voice message, 1 phone number set of 10 numbers, HMS/CMS Compatible
Sirius GSM - 8Z Alarm Panel	8 Zone , 1 Output, Autodialer, 1 SMS template, 1 Voice message, 1 phone number set of 10 numbers, HMS/CMS Compatible
1 Input Zone	
2 Input Zone	
4 Input Zone	
8 Input Zone	
1 Output port	
2 Output Port	
4 Output Port	
1 each of SMS template,Voice,Phone Numberset	
2 each of SMS template,Voice,Phone Numberset	
4 each of SMS template,Voice,Phone Numberset	
8 each of SMS template,Voice,Phone Numberset	

Autodialer	
2 Zone , 2 voice message, 2 set of numbers, 2 sms template	
4 Zone , 4 voice message, 4 set of numbers, 4 sms template	
Digital Communicator	
Sirius Digital Communicator	4 Port   Used for Central Monitoring System / Health Monitoring System   Connects with Burglar Alarm System   Connects with Fire Alarm System   Connects with CCTV
Sirius Digital Communicator	8 Port   Used for Central Monitoring System / Health Monitoring System   Connects with Burglar Alarm System   Connects with Fire Alarm System   Connects with CCTV
Sirius Digital Communicator	16 Port   Used for Central Monitoring System / Health Monitoring System   Connects with Burglar Alarm System   Connects with Fire Alarm System   Connects with CCTV
Sirius Digital Communicator	24 Port   Used for Central Monitoring System / Health Monitoring System   Connects with Burglar Alarm System   Connects with Fire Alarm System   Connects with CCTV
2 port interface	
4 port interface	
Accessories	
Product	Features
Speaker 90 db	Wired Output Device. For desired audio message / sound to deter security threat.
IOTA Siren 110 db	Wired Output Device. For sound to deter security threat.
Hooter with Strobe Light	Wired Output Device. For sound along with strobing light to deter security threat.
Power supply with Battery backup	Alternate source of power to operate electronic security devices
Panic Switch Wired	Wired Input Device. Activates alarm panel in case of security threat due to fire / intrusion/ health emergencies. Usually activated manually.
Magnetic Switch Wired	Wired Input Device. Activates alarm panel in case of security threat due to intrusion. Installed at doors
Magnetic Shutter Switch Wired	Wired Input Device. Activates alarm panel in case of security threat due to intrusion. Installed on shutters in shops.
PIR wired	Wired Input Device. Activates alarm panel in case of security threat due to intrusion. Installed within premises. Gets activated when detects movement of any person within its vicinity.
Smoke Sensor	Wired Input Device. Activates alarm panel in case of security threat due to fire. Installed within premises. Gets activated when detects smoke.
Heat Sensor	Wired Input Device. Activates alarm panel in case of security threat due to fire. Installed within premises. Gets activated when detects heat.
Manual Call Point	Wired Input Device. Activates alarm panel in case of security threat due to fire. Installed within premises. Gets activated when detects heat.
Response Indicator	Wired Output Device. An auxiliary indicator with LED for fire / smoke / heat detectors that are installed in closed spaces which are not visible (above false ceilings, in closed rooms, etc).
Multi Sensor	Wired Input Device. Activates alarm panel in case of security threat due to fire by detecting either heat or smoke.
Light Sensor	Wired Input Device. Activates alarm panel in case of security threat due to intrusion. Installed within premises. Gets activated when detects light.
Vibration/Impact Sensor	Wired Input Device. Activates alarm panel in case of security threat due to intrusion. Installed within premises. Gets activated when detects vibration or impact generated while breaking any window glass or wall.
Siren 1 Mile	Wired Output Device. For sound to deter security threat.
Siren 2 Mile	Wired Output Device. For sound to deter security threat.
LPG Sensor	Wired Input Device. Activates alarm panel in case of security threat due to leakage of LPG. Installed within / kitchen premises. Gets activated when detects LPG.
Panic Switch Wireless	Wireless Input Device. Activates alarm panel in case of security threat due to fire / intrusion/ health emergencies. Usually activated manually.
Magnetic Switch Wireless	Wireless Input Device. Activates alarm panel in case of security threat due to intrusion. Installed at doors
PIR Wireless	Wireless Input Device. Activates alarm panel in case of security threat due to intrusion. Installed within premises. Gets activated when detects movement of any person within its vicinity.
Remote Control (with arm,disarm and panic) Wireless	Wireless device operate alarm panels.
Note: Accessories will be of third party / Sirius, as per availability
